

**NEW!** Effective August 24, 2017, several new features are being added to the E-Services Inbox. The E-Services Inbox will allow you to:

- Set the default display to include the **Preview** by selecting **General Settings** from the menu and then **Show Preview by Default** and **Update**. The Inbox will then show the case names and additional information about a notice every time you open the E-Services Inbox.
- Hide the **Filter**, **Sort** or **Preview** options at the top of the E-Services Inbox page if you do not need them.
- Print or tag multiple notices at the same time by choosing a **Multi Selection** checkbox above the display of notices. This selection will activate checkboxes next to each item and a checkbox in the blue bar immediately about the notice to the left of **Issued**. You can choose the checkbox next to specific items that you want to print or tag, or you can choose the checkbox in the bar to print or tag all the notices in the E-Services Inbox at the same time. Once you have selected the items, you can choose **Print Selected Items** or **Add Tag to Selected Items**.

View updated information on these new features by going to [How Do I Access E-Services Inbox](#).
